

# VERSATILE TANKS

.COM.AU

## INTRODUCING OUR CONCRETE VERSATILE STRUCTURAL ENGINEERED TANKS

- Comes in 3 sizes
  - 22500 Litre capacity dimensions 2400w x 2600h x 4400 long 12 ton Weight
  - 11700 Litre capacity dimensions 2400w x 2400h x 2400 long 7 ton Weight
  - 6700 Litre capacity dimensions 1800w x 2100h x 2100 long 4 ton Weight
- Modular designs can easily interlink to increase tank capacity
- Tank fittings can be cast into the tank prior to pouring giving the assurance the fittings are secured fast.
- Any size, any location.
- Seamless innovation - no joins, no leaks.
- All structural steel used, cages are welded together and suspended in the mould assuring even concrete coverage surrounds the steel.
- All units are designed to be fully buried with an applied load rating on all the tanks, there is the option to have the tank partly buried, use the lid as a slab, place under driveways, in carports, use the tank wall as a retaining wall as well as a water tank.
- 300mm or 200mm riser can be supplied if placing dirt over the lid.
- Transportable via truck.
- A crane is required at the delivered site address to unload tanks into prepared site.
- Our tanks are mechanically vibrated (in our steel mould) eliminating air entrapment in the concrete, as well as our specialised mix design, this gives assurance that all the units produced do not leak. (We still conduct regular leak tests for quality assurance.)
